

# BCG

- Ensure timeliness of BCG

# OPV

- OPV0 should be extended to 6 weeks?

# Penta+OPV+PCV+Rota

- No changes needed
- Ensure timely vaccination

# MV

- Move MV down – because of specific protection – to close the gap between protection by MatAb and MV
  - 4 weeks after Penta3
  - 6 months of age
- Add a dose of MV at 4 weeks after penta3

# Yellow Fever

- Move YF earlier
  - Is this possible?
- Move YF later
  - Is this possible?

# Campaigns

- Continue OPV and measles campaigns

# Overall changes

- For new vaccines – check interactions with current vaccines on overall health

# Performance indicators

- BCG coverage (1 week, 2 weeks, 1 month of age)
- BCG scar assessment (6 weeks, 14 weeks, surveys)
- MV given after penta
- MV coverage (9 months, 1 year, 2 years)
- Missed opportunities
  - How to address this issue
